

Basic Information Technology.d

- 1 Someone who understands the digital technology is called ...
- 2 The ABC computer was developed in 1939 using ... technology
- 3 ... computer is expected to use in A Smart Fridge
- 4 ... computer is expect to be used in Providing the college registration application by the IT department
- 5 Gordon Moore's prediction that the number of transistors on a microchip doubles every two years has proven to be TRUE. ... of transistors contained in microprocessor today
- 6 Internet users exceeded 1 Billion in ...
- 7 ... is an Internet age witnessed the start of WWW and web browsing
- 8 ... computer is expect to be used in browsing the web in the University Library
- 9 ... played a vital role in world war two by enabling the allies to decipher Nazi army messages
- 10 ... is an Internet age was the Internet mainly used by professional users
- 11 USB flash drives are ... storage devices
- 12 Temperature sensor is a(n) ... device ?
- 13 ... is not an objectives of Green Computing
- 14 Backward compatibility of PlayStation CPU insures that Games developed for PlayStation 4 can be played on ...
- 15 The decimal number 3 is represented in binary as ...
- 16 An image that is currently opened in Photoshop is stored in ...
- 17 The binary number 1011 represents the decimal number ...
- 18 You doubt that ... can be represented as binary?

- 19 Approximately 1 million Megabytes is ...
- 20 The binary number ... comes after 101
- 21 ... is stored in binary
- 22 Your last resort in software troubleshooting is ...
- 23 ... permissions of a smartphone application for hotel booking is suspicious
- 24 ... is An application that suffers from low performance when many users are logged-in simultaneously
- 25 You can download and install software from any of the digital distribution platforms except ... because there is no such name.
- 26 A form used to apply to a public service is more suitable as ...
- 27 You installed a game that requires 4GB RAM and recommends 16GB RAM on a machine of 8GB RAM. The game will ...
- 28 Open source applications have the advantage of ...
- 29 The following are programming languages except ...
- 30 Python is a(n) ... language
- 31 System software is an interface between ...
- 32 ... is the operating system to be choose for our Internet application server.
- 33 To use an advanced scanner with your computer you will need to install the suitable ...
- 34 One of the following is a defragmenter utility software is ...
- 35 An external device that is automatically configured by the system when connected is ...
- 36 A simulator for practicing surgery is considered as ...
- 37 A weather forecast show that displays effect of expected whether on environment is considered ...

- 38) Windows 11 is a(n) ...
- 39) Nintendo – Wii is an example of devices that use ... interface
- 40) The booting process loads the OS from the Hard Drive into ...
- 41) The highest level of machine intelligence that is achieved so far is . . .
- 42) Robot receptionist in some government service offices can be classified as . . .
- 43) One of the following MS Word features exhibits more AI (not mere automation) is . . .
- 44) Use history of all students data to determine the expected graduation GPA for a new student is described as . . .
- 45) A technique for determining whether a computer can demonstrate AI is called . . .
- 46) . . . is the first devised the term “Artificial Intelligence”
- 47) Study traffic maps to choose best route can be described as ...
- 48) Decision support programs are designed to help managers make ...
- 49) The golden years of AI was in ...
- 50) VERA is a (n)
- 51) The number of pixel across one dimension of the image is the . . .
- 52) The number of bits used to store each pixel in the image is the . . .
- 53) The color depth that uses 1 bit to represent a pixel in the image is . . .
- 54) A green line is stored in this image by storing all the green dots along the line. This image is . . .
- 55) The type of image which is expected to have lower file size is . . .
- 56) The file format GIF is ... type of image
- 57) Your digital camera store a photograph as ...

- 58 Printed Circuit Board (Electronic Chips) is an example of ...
- 59 An undesirable feature to have in a presentation slide is ...
- 60 A circle is stored in an image by its center point location, size and color. This image is ...
- 61 To process media in computer it must be converted ...
- 62 The motion we see in videos is a result of... .
- 63 An animation contains 48 frames and has a duration of 2 seconds. The frame rate of the animation is . . .
- 64 If we drop some frames from an animation that will be . . .
- 65 One of the following file formats requires more space, it is . . .
- 66 Increasing the sampling rate will ...
- 67 In mono audio files, ... is used to produce sound.
- 68 A text that contains links to other text is ...
- 69 An example of interactive media is a(n) ...
- 70 Multimedia design requires ... skills to integrate two or more types of media
- 71 The minimal function of any network is to ...
- 72 Connecting your mobile phone to your wearable devices is an example of ...
- 73 A network connection that has a bandwidth of 2 Gb/s can transfer...
- 74 The device that forwards messages through the best path in WAN is...
- 75 The device that broadcasts messages to all nodes in LAN is. . . .
- 76 For different machines to communicate through the network, they must use
- 77 The network that teachers use to deliver online lectures is

- 78 Mesh networks have the advantage of
- 79 The network model of blockchain is ...
- 80 A car communicates with the parking system to determine if there is available parking. This is an example of ...
