

International Logistics.d

- 1 What does the concept of logistics primarily involve?
- 2 What is one of the main objectives of logistics management?
- 3 What are the general components of the logistics management structure?
- 4 Which form of logistics management focuses on improving the entire supply chain?
- 5 What is a significant cost associated with logistics?
- 6 How has international logistics development changed in recent years?
- 7 What does effective logistics management aim to balance?
- 8 What is a key element of logistics management in supply chain optimization?
- 9 What is a primary goal of logistics management in an international context?
- 10 What is an important consideration when managing logistics costs?
- 11 What does the 'Chain of International Trade' refer to?
- 12 What are the main functions of logistics in international trade?
- 13 What is a key requirement for successful logistics trade?
- 14 What do the "P's" and "R's" of logistics management refer to?
- 15 What aspect of logistics management is crucial in the export business?
- 16 What do International Commercial Terms (Incoterms) specify?
- 17 What is one of the main inbound functions in logistics?
- 18 What role does effective logistics management play in international trade?

- 19 What is an important component of international logistics?
- 20 How do "P's" and "R's" of logistics management impact the supply chain?
- 21 What does an overview of the transportation industry typically include?
- 22 What are the primary modes of transportation used in the industry?
- 23 What is a key aspect of transportation management?
- 24 What does freight rate or transportation pricing refer to?
- 25 How does communication play a role in transportation?
- 26 What is a significant environmental concern related to transportation?
- 27 What is a central focus of transportation management?
- 28 What does transportation pricing typically include?
- 29 What role does communication play in transportation management?
- 30 What is one of the main environmental challenges for the transportation sector?
- 31 What are the main methods of ocean shipping?
- 32 Which type of ship is specifically designed for carrying containers?
- 33 What role do shipping intermediaries play in the ocean shipping industry?
- 34 Which of the following is a major port of India?
- 35 What is a key aspect of ocean freight documentation?
- 36 What is the purpose of the International Chamber of Shipping?
- 37 What is the primary function of a container ship?
- 38 What is a common task for shipping intermediaries?

- 39) What document serves as proof of ownership and receipt for goods in ocean shipping?
- 40) Which organization works to improve international maritime safety and environmental protection?
- 41) What does infrastructure for air transportation include?
- 42) What is a major benefit of using airfreight?
- 43) What are the main classifications of airports?
- 44) What does the air cargo industry encompass?
- 45) Which method is used for air freight calculations?
- 46) What is a key component of international logistics for export product movement?
- 47) What does air transportation infrastructure include?
- 48) What is one of the main advantages of airfreight over other modes of transport?
- 49) How is air freight usually calculated?
- 50) What is a significant challenge for international logistics in export product movement?
- 51) What does containerization refer to in logistics?
- 52) What are common sizes for shipping containers?
- 53) What is a primary aspect of container handling?
- 54) What is the purpose of Inland Container Depots (ICD)?
- 55) What is a key function of Container Freight Stations (CFS)?
- 56) What is one of the primary roles of Inland Container Depots (ICD)?
- 57) What does containerization help improve in logistics?
- 58) What is an important aspect of container handling procedures?

- 59 What is the main function of Container Freight Stations (CFS)?
- 60 What are Inland Container Depots (ICD) primarily used for?
- 61 What does integrated logistics refer to?
- 62 What does Direct Product Profitability (DPP) measure?
- 63 What is the main focus of Distribution Requirements Planning (DRP)?
- 64 What is a key principle of Just-in-Time (JIT) inventory management?
- 65 What is a crucial aspect of warehouse management?
- 66 What are future developments in logistics likely to focus on?
- 67 What does integrated logistics aim to achieve?
- 68 What is a key benefit of Direct Product Profitability (DPP)?
- 69 What does Distribution Requirements Planning (DRP) help with?
- 70 What is the purpose of Just-in-Time (JIT) inventory systems?
- 71 What is e-commerce?
- 72 What does e-procurement refer to?
- 73 What is a primary benefit of big data in business?
- 74 What is the Internet of Things (IoT)?
- 75 What is the focus of automation and AI in business?
- 76 What does warehouse automation involve?
- 77 How does e-commerce benefit businesses?
- 78 What is a key feature of e-procurement systems?
- 79 What role does big data play in modern businesses?

80

What is a common application of the Internet of Things (IoT) in logistics?
