

АНГЛИЙСКИЙ ЯЗЫК.Э (2)СПО

- 1 Read the texts and match them with the headings. There is one extra title. Every family needs a homemaker. Whether this is the mum or dad, or part-time from both is irrelevant. In our family, we chose the traditional role for me to stay at home, but some families choose the reverse, especially if the woman has the better-paid job. We have actually experienced both since I had to work full-time when my husband was made redundant and stayed at home for a time. The days when the person staying at home to look after the house and family was thought of as being just a housewife have long gone, especially now that there is a role reversal and it is sometimes the man who stays home. Nowadays there is a lot of pride in being the homemaker. It is one of the most worthwhile careers and the rewards, although not financial, are great. The family benefits from quality time from one parent all the time.
- 2 Read the texts and match them with the headings. There is one extra title. So, after my first baby arrived, I felt for years that I had the perfect job. I was my own boss. I could work when I wanted and have a rest when I wanted. If I didn't feel like cleaning or doing the shopping and wanted to have a day off, that was fine. Nobody else would have to be asked to cover for me, my work could wait until I was ready to do it. Oh yes, it was hard work taking care of our home and our children and the hours were long, but the work was varied and very rewarding. In fact, being a homemaker was the perfect job for me. I was absolutely happy being a housewife and mum. Watching my children thrive, witnessing their first steps, hearing their first words and all the other milestones were worth more than any amount of money.
- 3 Read the texts and match them with the headings. There is one extra title. I don't know how you stay at home all day... I would be bored out of my mind, was a comment I often heard when I stayed at home. Was I bored? Never! I mastered the housework so that I wasn't a slave to it. Obviously, there was the cleaning to be done regularly but it was the sharing of the tidying up that made the difference. My family learnt to tidy up after themselves and if there was a bit of accumulated dust it would wait until the end of the week when a day was set aside for a thorough cleaning. I established a routine for the necessary chores that had to be done daily, but if they weren't completed by lunchtime, they were left until the next day. That way I had time to pursue my own interests and to spend time with the children as well.

- 4 Read the texts and match them with the headings. There is one extra title. There were financial downsides of course to staying at home. New clothes and regular hairdos were a luxury. Social outings were those which included the family, perhaps going for a walk in the countryside, or taking a picnic. Expensive meals in restaurants were way beyond our means and out of the question. After my second child my former boss asked if I would consider returning to work. The salary would have been very welcome but there was no way anyone was going to look after my children except me, until they were old enough to go to school. Money was less important to me than my family. Besides, I would still have to pay someone to care for my children.
- 5 Choose true sentence according to the text. Homemaking...Every family needs a homemaker. Whether this is the mum or dad, or part-time from both is irrelevant. In our family, we chose the traditional role for me to stay at home, but some families choose the reverse, especially if the woman has the better-paid job. We have actually experienced both since I had to work full-time when my husband was made redundant and stayed at home for a time. The days when the person staying at home to look after the house and family was thought of as being just a housewife have long gone, especially now that there is a role reversal and it is sometimes the man who stays home. Nowadays there is a lot of pride in being the homemaker. It is one of the most worthwhile careers and the rewards, although not financial, are great. The family benefits from quality time from one parent all the time.
