- 36 Read the text Over the last four decades, technology entrepreneurship has become an increasingly important \_\_\_\_\_ phenomenon. It is perceived as necessary \_\_\_\_\_ growth, differentiation, and competitive advantage at the firm, regional, and national levels. Technology entrepreneurship appeals mainly to leaders and top management teams of small and large firms \_\_\_\_\_ use technology to create, deliver, and capture value for \_\_\_\_\_ stakeholders. Technology entrepreneurship \_\_\_\_\_ appeals to personnel of regional economic development agencies that attract \_\_\_\_\_ in productive technologies and talent to a particular geography. The primary function of technology entrepreneurship \_\_\_\_\_ to assemble a combination of specialized individuals and heterogeneous assets \_\_\_\_\_ create and capture value for the firm through collaborative exploration and experimentation. The combination, some of the assets, or the assets' attributes may be unique and novel. \_\_\_\_\_ initial combination may change over time. In \_\_\_\_\_ article, the literature on technology entrepreneurship was classified into eight \_\_\_\_\_. The literature search revealed that \_\_\_\_\_ of the articles on technology entrepreneurship appeared in journals not considered \_\_\_\_\_ be in the technology innovation/entrepreneurship domain. The article offered a definition \_\_\_\_\_ technology entrepreneurship. A better definition of technology entrepreneurship can help \_\_\_\_\_ its performance, increase its relevance, and establish it as a legitimate domain of inquiry in its own right. This definition \_\_\_\_\_ to identify and incorporate the various distinctive aspects of technology entrepreneurship and its links to the existing domains of economics, entrepreneurship, and \_\_\_\_\_. The definition, \_\_\_\_\_ the corresponding features and links, requires particular attention from scholars and practitioners. The aspects of technology entrepreneurship to which we need to pay particular \_\_\_\_\_ are identified. These aspects are: i) the interdependence between scientific and technological change and the selection and development of new combinations, assets, and asset attributes; ii) biases in the existing entrepreneurship literature; iii) conceptualization of technology entrepreneurship as an investment \_\_\_\_\_ a project, rather than opportunity recognition or venture formation; and iv) links among technology entrepreneurship, the theory of sustainable competitive advantage, and the theory of the firm. Complete the gap with the right option: Over the last four decades, technology entrepreneurship has become an increasingly important \_\_\_\_\_ phenomenon.
